- Projects include: Lead Developer of a system for a large financial institution to track funds from construction loans. Lead Developer of a Document Tracking System for an International Life Insurance Co., Development and Marketing of Enterprise Level Landscaping System., Development and Marketing of a system geared towards gas jobbers and the gas stations they service, which allows them to track daily price changes and sales at each price, other projects as assigned.
- Developed these applications with VB.Net 2003/2005/2008, ASP.Net and SQL Server 2005/2008, Crystal Reports.

November 2010 – January 2011

T2 Software Services 3818 Gunn Highway, Suite 208 Tampa, FL 33618

- Employed as a Consultant on Site for **Catalina Marketing**.
- Worked as a Developer on in-house projects relating to the accounting system. Work included all software development tasks from developing design documents to testing the finished project.
- Developed these applications with VB.Net 2010, ASP.Net, Oracle, and Netezza

November 2009 – April 2010

Insight Global 1 North Dale Mabry Highway, Suite 1000 Tampa, FL 33609

- On-site consultant at **Tampa General Hospital** developing Web based applications for use by the Information Technology department.
- Provide development and research expertise as needed as well as support customers internal to IT.
- Used VB.Net, ASP.Net, and SQL Server 2008.

April 2009 – November 2009

JBH Consulting 1358 Weber Drive, Clearwater, FL 33764

- Self employed consultant providing a full range of Information Technology services to clients on an as needed basis.
- Tasks included Developing Web sites, and assisting in design of sites under development. Used VB.Net, ASP.Net, and SQL Server 2005/2008.
- Performing Search Engine Optimization to make those sites rank high in search engine rankings,
- Analyzing business processes and procedures and offered solutions to increase productivity and sales.

August 2008 – April 2009

Homeowners Choice 2340 Drew St, Clearwater, FL 33765

- Developed Agency Portal for a Property and Casualty Insurance Company which allowed our Agents access to policy specific information.
- Built a development and testing environment from the ground up, consisting of one machine with MS SQL 2008, another that functioned as the Web Server with Internet Information Services, and another that was the development machine with Visual Studio 2008. Implemented all of these machines from taking them out of the box to production.
- Researched solution to provide roof-top level geo-coding data for properties that we insured, allowing us to insure properties with a low risk factor for natural disasters.
- Developed Excel Spreadsheet to calculate Wind Mitigation Factor for properties that we insured, which allowed us to provide more competitive rates for property owners who had made roof improvements.

May 2008 – August 2008

PF1 Professional Services 4702 W. Comanche Ave Tampa, FL 33614

- Added enhancements to a web application for **Asbury Automotive**, a national Auto Dealership. This system managed the purchase and sales of pre-owned vehicles between 30+ dealerships owned by the corporation.
- Added Security to the application so Dealers could only see information specific to their dealership.
- Used Crystal Reports to enhance reporting capabilities
- Sole Developer for Client. Was given specs and provided monthly updates to my VP.
- Developed using VB.Net, ASP.Net, SQL Server 2005, and Crystal Reports

November 2005 – August 2006

Millenium Consulting 2203 N. Lois Ave. Suite 900 Tampa, FL 33607

- Employed as an onsite consultant for **Market Street Mortgage**.
- Designed and developed web based application which allowed the Marketing Department to track relationships with specific business partners.
- Recorded which builders were sending the most business to my employer, which allowed the company to devote more attention to these builders.
- Used VB.Net, ASP.Net and SQL Server 2005.

April 2003 - October 2005

Real Property Info Systems 3665 Bee Ridge Road Suite 100 Sarasota, FL 34233

- Developed a Suite of Applications for use by the Real Estate Industry. They included:
- **IUpdesk** – This application is used by Real Estate agents to search the MLS for properties based on criteria such as zip code, price range, # of bedrooms and baths. This was developed using VB.Net and SQL Server.
- **ICallCenter** – This application is used by the receptionist at the Real Estate office call center. When a customer would call with an interest in a specific property, it would search the appointment schedule for the property, and allow the operator to schedule an appointment for the client. Then the application would send an email and/or text message to the listing agent giving them the appointment specifics, including client information. This application also contains many of the property search features of IUpdesk.
- Applications were developed using VB.Net, ASP.Net, SQL Server 2000.

September 1998 – February 2003

Quality Systems 18191 Von Karmen Ave #450 Irvine, CA 92612 (800) 888-7955

- Developed commercial applications for the Medical Industry.
- My duties as Senior Developer encompassed all areas of the software development life cycle on the company's primary application, the NextGen Practice Management System.
- Developed this system, which consisted of over 100 forms, 80 bas modules, and had over 100 com dlls which were written in house, with VB 6.0 and SQL Server.

December 1995 – September 1998

GTE/Verizon Tampa FL

- Developed solution to aide Forecasters in creating yearly and monthly models of line and special service growth.
- Converted Access system to Visual Basic front-end while using Access for the database, then converted from Access to SQL Server.
- Developed applications to interface with mainframe system to process various types of service orders, which saved much time, and errors from manual data entry.

December 1991 – August 1995

Tech Data Corp. 5350 Tech Data Drive, Clearwater, FL 34620 (813) 539-7429

- Designed and developed many applications to support distribution, sales, and marketing activities.
- Member of team that developed Product Vision application which was the primary system that the Sales Force used to quote prices and availability to customers.
- Developed system which operated in all of Tech Data warehouses, which interfaced with systems from Fed Ex and UPS, a digital scale, and barcode printer which printed all labels on packages that we shipped with an uptime of over 99.99%
- Developed system named the Spiff system, which tracked bonuses offered to the Sales force from Vendors to promote their products.
- Was member of team that converted disparate databases (FoxPro, Clipper, Access, and Btrieve) to MS SQL Server.
- Used Visual Basic, Foxpro, Clipper, Btrieve, and SQL Server as development tools.

August 1987 - December 1991

Arthur Andersen & Co. 2803 Fruitville Road, Sarasota, FL 34230

- Final position was a Senior Systems Programmer who supervised a staff of 4 who handled all responsibilities for the Electronic Workpapers Application. Under my leadership this system gained a higher level of customer satisfaction than any of AA's other products.
- Created AA's first Electronic Filing Program which was implemented during the 1998 tax season.
- Systems were developed with a DOS based version of Basic called Libra basic.

Education: Bachelor of Science in Mathematics from the University of Kentucky.
